Highway Department

*To William A. Bixby, Stephen W. Clow and Horace Rust,
Selectmen of Wolfeboro, N. H.:*

I hereby submit the following report as Highway Commissioners of the town of Wolfeboro, 1916:

Owing to the extremely wet season, a great deal of the repair work had to be gone over the second time without the results we would have had under more favorable conditions. The scarcity of help was a big factor in my not doing the amount of work laid out to do.

New Highways

Clark Road has been built a length of about 4,500 feet, a small portion of the lower end not being completed. This piece of road cost \$1,210.25, but through the generosity of Mr. James H. Mason, who contributed \$1,000.00, the cost of the road to the town was small. Also an extension to Sewall Road of 150 feet was built at a cost of \$115.50.

State Aid, Construction

On North Main Street beginning opposite the Rendall house to the top of Shield's Hill a distance of 2,200 feet has been built, water-bound macadam, also from the foot of Shields Hill, a distance of 1,110 feet to a point opposite John H. Libby's house, was built in the same manner.

State Aid, Maintenance

All the State road in town has been treated to a coating, surface treatment, with No. 4 oil, and sanded at a cost of \$548.27, one-half of this being contributed by the State.

A new bituminous macadam road has been built, beginning at Pickering Corner, a distance of 900 lineal feet. The road was properly graded, 8 inches of telford base, 20 feet wide, covered with 6 inches of crushed rock, and two applications of

Binder B were applied in the surface construction. The total depth of stone was 14 inches, making it a road that will stand the heaviest traffic.

There was also built 300 feet of bituminous macadam on Glendon street. For the cost of general highway, see following report.

Report of the Librarian

To the Board of Trustees of the Wolfeboro Town Library :

Gentlemen :—The eleventh annual report of the Librarian is herewith presented.

No special features have developed in the library work for the year. The extra work done has been the filing of the borrower's and name cards in a neat cabinet, where they are more accessible for reference.

During the year, 485 books have been added to the two libraries, 45 of which were gifts. The books in the room now owned by the town number 2,636.

The total circulation has been 18,049, of these classes : fiction, 8,581 ; non-fiction, 3,287 ; children's books, 6,181.

Three new magazines. The Bookman. Industrial Arts

Magazine and Survey have been added, and Everybody's substituted for McClure's. There are now 39 periodicals in the reading room. Of these 19 are on the Town list, 10 belong to the Brewster Free Library, and 9 are contributed.

To New Hampshire belongs the honor of establishing the first free public library in America supported by taxation. It is said that from the public library alone one can obtain a point of view on any question which is both non-partisan and non-sectarian. Our children are coming to the library at an early age. Shall it not receive the support of all of our citizens?

The Librarian extends thanks to friends for so generously contributing books and periodicals, and for the many helpful suggestions given; also to the Trustees for their sympathetic coöperation.

Respectfully submitted,

ELIZABETH BREWSTER, Librarian

Health Department.

TO THE PEOPLE OF WOLFEBORO:

Citizens:—The Health Department announces, viz:—Expenses for the current year have been reduced 50%. One family only has been allowed assistance, being non-resident and without means; a scarlet fever case, the sum of three dollars per week credit at a grocery store, while a reasonable amount was allowed the attending physician. Seventy-two ultimatums were officially issued; one hundred and twenty-three complaints investigated and disposed of; forty-one clean bills of health issued to those leaving town; ten permits issued for transportation of dead bodies beyond town limits; three public nuisances disposed of. Present at Concord Conference of State and County Officials of the Department, once; one each County Conference and annual meeting of Carroll County Association. All public waters, drainage system and reservoirs are in such condition as to give Wolfeboro the best water analysis of any supply in the State.

Health rules have been formulated and approved by State and town officials, and operate satisfactorily. There have been no prosecutions. The offenses, spitting on sidewalks, in halls and in public places, have been so common that nearly one-half of the town has been repeatedly warned. Inasmuch as the *last* warning has been given, arrest now confronts violators of that order. Carrion, lying on the highway abutting the property of citizens, heretofore was presumed to be removed by the Health Department. Today, the occupants, owners, or lease-holders are held responsible for such removal, and liable to process and punishment if they neglect to remove such nuisance.

After May 1st of any year to Nov. 1st, no privy is to be disturbed after 5 o'clock a. m. until 9 o'clock p. m., and no privy excrements may be carted or transported through the streets or public rights of way in any residential or village precinct, during the prohibited times. When removed from vault to lay, excrements must be immediately covered entirely from public view, or the view of neighboring residents.

There have been three cases of tuberculosis, two of scarlet fever, seven of measles, nine of itch, three of mumps, eleven of whooping cough and seventeen of lice reported. All have been taken care of.

Fumigating materials have soared to an almost prohibitive price, but this Department is fortunate to have on hand probably a year's supply at original current prices. There has been an unusual number of deaths, the current year, but in no instance reported did any abnormal or unsanitary condition enter into the history. Wolfeboro, as a matter of fact, is ranking with the cleanest settlements of the State.

The recent analysis of our water supply is, viz:—Source of sample, tap, town system. Odor, slightly woody. Color, 12. Turbidity, faintly opalescent. Sediment, nitrates, nitrites, total solids and fixed solids, iron, zinc, lead, none. Free ammonia, .0008. Albuminoid ammonia, .0046. Chlorine, .08. Hardness, .2. Colon bacilli, negative, 1 & 10 cc. Good water.

To remove odor, ammonia, albuminoid and colon bacilli, the pond must be fenced from cattle, bathing prohibited, and animal travel and dropping on ice be discontinued; which remedy the Department in the near future may deem essential to order. The ruthless prostitution of the Back Bay is noticed, which suggests ambitious conservation to private interests, rather than sanitary betterment. A plan to remedy is solicited.

CHARLES O. DOE, Health Officer.
